INSTRUCTIONS

BATTERY SETUP

Before each use, be sure to remove the YELLOW label on the battery. In fact, complete activation of the battery is subjected to a chemical reaction through contact with air.

In case you want to place the product in a box, it is recommended to remove the label 1 hour before the use of the battery and to provide a ventilation system in the box to facilitate combustion.

USAGE

The battery can be used to power AJAX alarm systems via the panel's own power supply module (check compatibility at voltage level).

Simply connect it to the panel board in a remote location.

CHARGING THE BATTERY

The battery is not rechargeable.

BATTERY LIFE

The battery life varies between 7 and 12 months depending on the type of battery, its use, and the weather conditions.

NOTICE

- Do not disassemble or modify the battery.

- Do not use a battery that is deformed, leaking, corroded or visibly damaged.

- If the product emits an odor, heat or smoke, DO NOT USE it and unplug it immediately. Using a damaged product or part of a product may cause injury.

- Do not dispose of the product with household waste, but in battery containers intended for this purpose.

WE DISCLAIM ALL LIABILITY FOR ANY LOSS, DAMAGE, INJURY, OR LITIGATION ARISING FROM FAILURE TO COMPLY WITH THE SAFETY INSTRUCTIONS DURING USE OF THE BATTERY OR ONE OF ITS ACCESSORIES.
