1. Introduction

CH341SER.EXE is the CH340G data cable driver (for Windows).

1.1. System Requirement

The driver can run on Windows 10 (and above).

Note: The older versions of Windows failed to install the driver, which may be caused by not installing Microsoft security updates.

Queclink Confidential

2. Driver Installation

2.1. Step_1: Run CH341SER.EXE

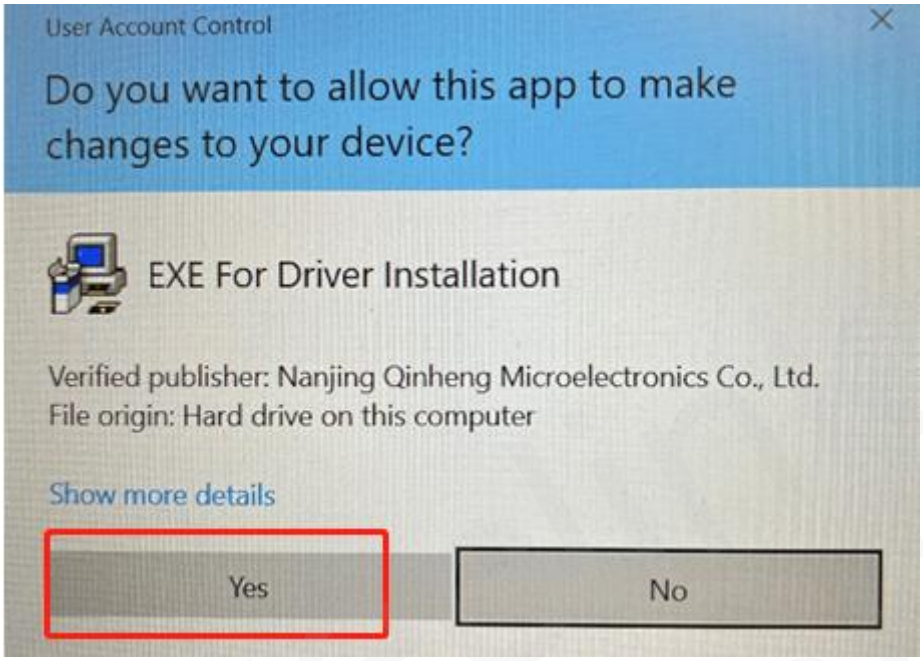

Figure 1: Confirm installation

After choosing the EXE file, this confirmation box will pop up, select **Yes.** Then the installation interface will pop up.

2.2. Step_2: Click **INSTALL** on the Installation Interface

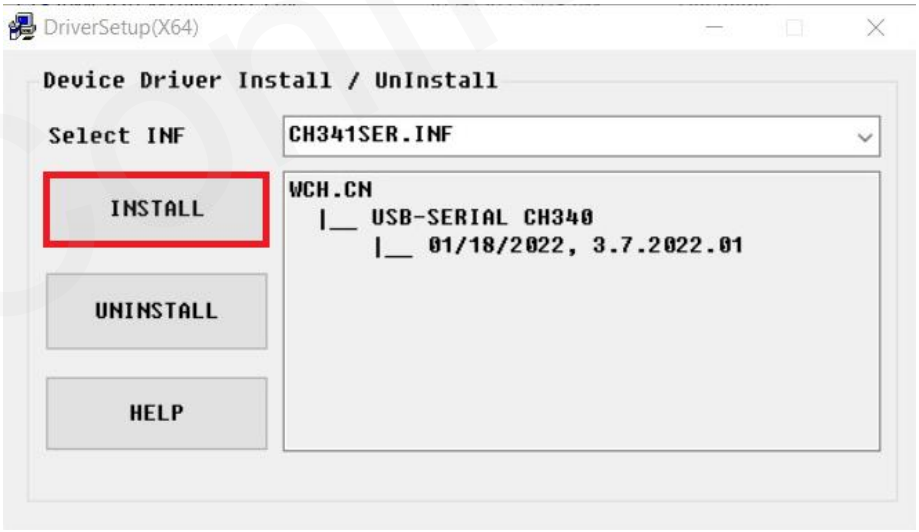

Figure 2: Installation Interface

2.3. Step_3: Successful installation

Case 1: When installing the driver, the CH340 data cable is connected to the computer.

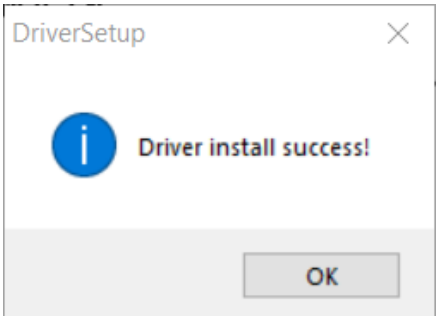

Figure 3: Successful installation_1

Case 2: When installing the driver, the CH340 data cable is not connected to the computer.

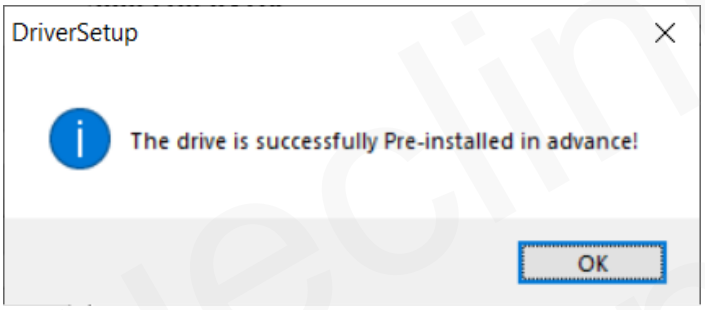

Figure 4: Successful installation_2

When connecting the CH340 data cable to PC but without the driver installed, it will display as follows:

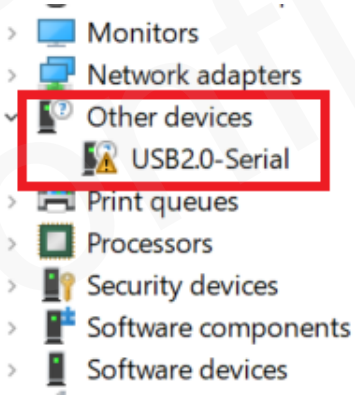

Figure 5: Serial display_1

After the installation is successful, the COM port will display as follows:

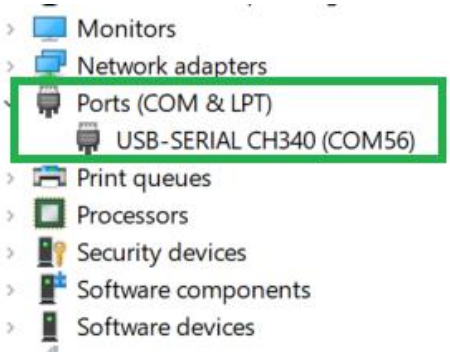

Figure 6: Serial display_2

Note:

If the system is Windows 10 (and above), the driver may be automatically installed when the CH340 data cable is connected to the computer.
